

Jan Scholten

stages & synchronicity

3 day seminar | Dublin | 6.- 8. November '09

About the seminar...

> Following the success of the seminar in 2007, we are proud to announce the return of Jan Scholten to Dublin with further developments and clarification of the periodic system, unravelling the mystery of the Lanthanides and giving structure to the confusion of plant family classification.

> Synchronising plant families with the stages of the periodic system is the next natural step in the evolution of homeopathic methods. The versatility of using these stages with any kingdom makes selection of the remedy a simple procedure of family theme and stage.

> In this seminar Jan will define the themes of plant families and interpret the method of using the 18 stages within each plant family. He will also demonstrate the use of Lanthanides, and their value in today's pathology, using the simplicity of the stages.

> With careful consideration and years of research, cases and provings, Jan will present his understanding of various plant families and their use in homeopathic practice. Prescribe accurately and successfully without getting 'lost in the fog'. Giving direction to the case, purpose to the questioning and rewarding results.

> Jan is a researcher, a great mind of our time, his seminars are always full of interactive discussion and illuminating honesty. The success of the periodic system suggests that his plant family groupings will be equally insightful and easy to grasp.
